Work Experience

Dec/16 - today **Council on Foreign Relations (remote)** **New York, NY, USA**

Software Engineer

Focused on designing and implementing new features for the ForeignAffairs.com website, as well as handling support tickets. Work with technologies like PHP, Drupal, Vagrant, Ansible, Jenkins, Jekyll, SASS, Gulp, AngularJS, Jira, Confluence, etc.

Mar/15 - Sep/16 **Trellon, LLC (remote)** **Washington, DC, USA**

Lead Developer

Helped mostly non-profit and higher-ed clients on getting the most of their limited budgets by choosing wisely where to invest time in order to generate value and make the difference. Spearheaded the requirements gathering for new projects; Defined solutions and implemented proof-of-concepts which led to successful deliveries; Developed test suites using Behat minimizing the deployment issues.

Oct/14 - Jun/15 **Project6 Design, Inc (remote)** **Berkeley, CA, USA**

Senior Software Developer

Provided development, support and consultancy services on Drupal backend and frontend solutions. Delivered a new site for a large Electrical contractor in the USA focused on showcasing their clients and services, as well as system for managing sub-contractors and invoices.

Dec/13 - Nov/14 **CI&T Software Brazil** **Campinas, SP, Brazil**

Senior Software Architect

Responsible for designing, validating, developing and estimating the technical solutions related to pre-sales and intakes for a large-size healthcare company in North America and EMEA regions. Support to different teams within the company ensuring the software quality, process and best practices adherence and people mentoring.

Dec/11 - Nov/13

CI&T Software Pacific

Ningbo, ZJ, China

Senior Software Architect

Led a 20+ people multicultural agile team; Responsible for designing and validating the architectural solution, for small to large-sized projects, mainly developed using PHP/Drupal and integrating with .NET and Java web services;

Worked closely with managers and clients giving them technical insights about the projects;

Responsible for the performance and connectivity tests;

Organized internal events and led people toward participating in the Drupal community.

Nov/09 - Dec/11

CI&T Software Brazil

Campinas, SP, Brazil

Software Architect

Leading a 50+ people team mainly in a technical perspective ensuring they used the best approach when implementing solutions/features;

Designing, validating and developing the architectural solution for PHP/Drupal projects.

Defined the process, checklists, templates and best practices for ensuring a smooth deployment. Part of it was used by a Fortune 500 Healthcare client as the standard process across all vendors.

Partner with the managers and business units, giving technical insights.

Jul/05 - Nov/09

Litoral Press

Santos, SP, Brazil

Senior Software Engineer
